OBJECTIVE

Final-year B.E. CSE (Cyber Security) student passionate about SOC and GRC roles. Skilled in threat detection, log analysis, SIEM tools, and incident investigation for security monitoring. Familiar with risk frameworks (ISO 31000, FAIR) and compliance standards (DPDP Act, CERT-In, PCI DSS, GDPR) for governance and risk management. Eager to apply this knowledge to strengthen organizational security through SOC and GRC functions.

AREA OF INTEREST

- Security Operations Centre (SOC) — Log Analysis
- Incident Responder
- GRC

EDUCATION

B.E. Computer Science & Engineering (Cyber Security)

Dr Mahalingam College of Engineering and Technology, Pollachi | CGPA: 8.5

HSC | Oxford Matriculation Higher Secondary School, Kongalnagaram

Percentage: 88%

SSLC | Oxford Matriculation Higher Secondary School, Kongalnagaram

SKILLS

- SIEM Tools: Splunk, Wazuh
- Networking: TCP/IP, OSI, DNS, DHCP, HTTP/S, NAT
- Frameworks: MITRE ATT&CK, Cyber Kill Chain
- Tools: Wireshark, Burp Suite, Nmap, Nessus
- OS: Kali Linux, Ubuntu, Windows
- GRC Frameworks: PCI DSS, NIST, HIPAA, GDPR, SOC2, ISO 27001, DPDP
- GRC Fundamentals: Risk Identification & Assessment, Control Validation, Compliance Documentation
- Soft Skills: Analytical Thinking, Effective Communication, Problem-Solving, Team Management, Leadership Quality

PROJECTS

Automated Cyber Threat Intelligence Pipeline for SOC Operations

- Designed and implemented an automated Cyber Threat Intelligence (CTI) pipeline to collect, process, and enrich threat data from multiple intelligence sources.
- Integrated threat intelligence feeds, Indicators of Compromise (IOCs), and MITRE ATT&CK mapping to improve threat detection, correlation, and analysis capabilities.
- Automated threat enrichment workflows and generated actionable intelligence reports to support SOC monitoring, threat hunting, incident investigation, and response activities.

SOC Detection Lab – SSH Brute Force Analysis

- Conducted security event monitoring, log analysis, and threat detection to identify SSH brute-force attacks and potential Indicators of Compromise (IOCs).
- Investigated security alerts using SIEM concepts, log correlation, and threat intelligence to analyze attacker behavior and assess security incidents.
- Applied incident response and threat hunting techniques to document findings, identify attack patterns, and recommend remediation following SOC best practices.

Operation Glass House: Endpoint Detection & Response Lab (SOC Home Lab)

- Architected a centralized SIEM lab by deploying Wazuh (Manager, Indexer, Dashboard) on Ubuntu and onboarding a Windows 10 endpoint agent, enhancing visibility with Sysmon to capture process, network, file, and registry activity.
- Simulated real-world attacks from a Kali Linux VM (ICMP discovery, Nmap enumeration, EICAR malware drop) to red-team the lab and validate end-to-end detection coverage.
- Detected 3+ attack techniques mapped to MITRE ATT&CK (e.g., T1105 – Ingress Tool Transfer) and validated system hardening via CIS Windows 10 benchmark compliance scans through Wazuh's SCA Module.

INTERSHIPS

Hack-up Technology — Cybersecurity Intern, Coimbatore

Jun 2025 – Jul 2025

- Learned and applied core cybersecurity principles in real-world environments.
- Conducted basic vulnerability scans and system assessments using tools like Nmap and Wireshark.

CERTIFICATIONS

- EC-Council — Certified SOC Analyst (CSA) — Currently Pursuing
- ISC2 — Security Principles, Access Control Concepts — Course Completion (foundational to GRC control domains)
- Let's Defend Badges: How to Investigate SIEM Alert, SOC Member, Incident Handler, Phishing Expert
- Let's Defend: SOC Fundamentals, SIEM 101
- Hex Camp — Splunk SIEM Challenge
- TryHackMe Badges

EXTRACURRICULAR ACTIVITIES

Program Coordinator – Encryptix, Department of Cyber Security

- Coordinated cybersecurity workshops, Capture The Flag (CTF) competitions, and technical events for over 100+ students.
- Collaborated with faculty and student teams to plan, organize, and execute department activities.

College Cricket Team Member

- Represented the college in inter-college cricket tournaments. Demonstrated teamwork, discipline, leadership, and effective communication in a competitive environment.

ACHIEVEMENTS

- Successfully completed 25+ TryHackMe labs, strengthening practical skills in Networking, Linux, Web Application Security, the Junior Security Analyst Path, and CEH-related concepts.
- Completed 35+ PortSwigger Web Security Academy labs, gaining hands-on experience in web application penetration testing, automated vulnerability scanning, and manual security testing.
- Secured 3rd Place in the TECHNOFETE Intra-College Cybersecurity Competition (Sea o' Thieves Challenge), demonstrating strong problem-solving and cybersecurity skills.
